

JANE SMITH

Python Backend Developer

jane.smith@email.com | linkedin.com/in/janesmith | github.com/janesmith

SUMMARY

Backend developer with 4 years of experience building REST APIs and data-driven web applications with Python, Django, and PostgreSQL.

SKILLS

Python, Django, Django REST Framework, FastAPI (basic), PostgreSQL, REST APIs, Git, GitHub Actions, Docker (learning), HTML/CSS

EXPERIENCE

Software Engineer ? Cloudline Apps (2022 - Present)

- Built and maintained 12+ REST API endpoints in Django REST Framework serving 50k daily active users.
- Reduced average API response time by 35% via PostgreSQL query optimization and caching.
- Wrote CI pipelines with GitHub Actions running automated test suites.

Junior Developer ? BrightSoft (2020 - 2022)

- Developed internal dashboards with Python and Flask.
- Collaborated in an agile team of six engineers.

PROJECTS

Ecommerce Order Service - Django + PostgreSQL service handling order lifecycle with JWT authentication; deployed with Docker Compose.

Weather Analytics Dashboard - Flask app consuming third-party APIs, charting trends with Plotly.

EDUCATION

Bachelor degree in Computer Science, State University (2016 - 2020)

CERTIFICATIONS

AWS Certified Cloud Practitioner (2023)
